PROFESSIONAL SUMMARY

Computer Science graduate with practical experience in full stack web development and machine learning. Skilled in building real-time and responsive web applications using Angular, Firebase, React, and Node.js, and developing predictive models using KNN and XGBoost.

EDUCATION

- Federal Institute of Science and Technology** Angamaly
Board: KTU, B.Tech in Computer Science and Engineering, CGPA: 8.65 2021–2025
- MGM Higher Secondary School** Kuruppampady
Directorate of Higher Secondary Education, 99% 2021
- St. Augustine's Girls Higher Secondary School** Kothamangalam
Kerala Board of Public Examination, 95% 2019

TECHNICAL SKILLS

- Languages:** Python, JavaScript, SQL, C, Java
- Technologies & Frameworks:** Angular, React, Node.js, Express.js, HTML, CSS, Bootstrap, Firebase, MongoDB
- Machine Learning:** KNN, XGBoost

CERTIFICATIONS AND ACHIEVEMENTS

- TCS Codevita:** Global Rank 4799 on season 11
- NPTEL Certification (Elite+Silver):** The Joy of Computing using Python
- NPTEL Certification (Elite):** Data Base Management System
- Udemy Certification:** Machine Learning with Python
- Coursera:** MERN Stack Certification

INTERNSHIP

- NEST DIGITAL ACADEMY**
 - Developed responsive frontend applications using Angular (e-commerce UI, portfolio)
 - Designed user-friendly interfaces using Bootstrap
 - Gained hands-on-experience in component-based development

PROJECTS

- Courier Service Management (Angular, Firebase)**
 - Developed a full stack courier service management system with features including parcel booking and order tracking.
 - Implemented secure user authentication and role based access, real-time database updates and sending notification by utilizing firebase functionalities.
 - Integrated Stripe API and utilized bootstrap features for responsive design
- Full Stack TODO Application (React, Node.js, Express, MongoDB)**
 - Built a task management application with complete CRUD functionality
 - Developed REST APIs for handling user data and implemented JWT authentication
 - Enabled real-time updates with responsive UI design
- Movie Success Prediction System (Machine Learning)**
 - Developed prediction model using KNN and XGBoost for predicting popularity of upcoming movie.
 - Applied clustering to classify target audience groups using Fuzzy-C-Means
 - Integrated ML models with frontend using Python

VOLUNTEER EXPERIENCE

- Tutor**
 - Conducted Python workshop for first-year Computer Science students at FISAT
- Coordinator (MANTRA Event)**
 - Coordinated and conducted the coding competition
